

In the Summary of the Invention section, amend the paragraph beginning on page 4, line 21 and ending on page 5, line 2 as follows:

- exposing the composition containing said fibers, in a layer of thickness less than said given thickness, to ionizing irradiation, in order partially to polymerize the resin and to obtain a precomposite in which said composition is in the solid phase, the exposure to ionizing irradiation being stopped once an index D constituted by the Shore D hardness of the precomposite divided by the Shore D hardness of the final composite has reached a value of the order of 0.5 and before the index D has reached a value of the order of 0.7;
